

Biographical Sketch

Steve Burrell has a M.S. in Agricultural Engineering from the University of Idaho, and is a registered professional engineer in the state of Idaho. As an employee of Idaho Department of Water Resources since 2001 and previously in 1987, Mr. Burrell has been involved with collection and analyses of surface and ground water data for managing water distribution to meet irrigation, industrial, and municipal demands in the state. Previously, he worked 10 years at Morrison-Knudson performing surface water modeling and other tasks in support of water resource and environmental remediation projects.
